

## Dynaudio Connect firmware update instructions

### Requirements

- An empty USB stick, formatted to FAT32
- A USB-A Female > Micro USB-B Male adaptor (Supplied with the Connect)
- The relevant firmware file

### Steps

1. Unzip the Zip file
2. Copy the \*.fw firmware file onto the USB stick.
3. Disconnect the power cable, wait for 5 seconds, and reconnect the cable. Wait for boot-up sequence to complete. This will take 40-45 seconds.
4. Insert the USB stick in the micro USB adaptor and connect the adaptor to the *Service* port on the back of the Connect, and wait 10 seconds.
5. Press and hold *Bluetooth Setup* and *WiFi Setup* buttons together until LED's on front panel go out. Then release both buttons.
6. All three LED's on front panel of Connect should now be blinking. If not await no blinking and perform #1-6 again.
7. Firmware update is now in progress. All LED's will be blinking until finalized and rebooting.
8. After loading, remove USB-disk and perform reset by press-and-hold *Bluetooth Setup* and *WiFi Setup* buttons for 3 seconds until LED's go out.
9. Await reboot
- 10. Plese note:** After the firmware upgrade the Connect will be reset, and you have to repeat WiFi and Bluetooth setup.
